

# NWSDA

## North West Shelf Digital Atlas (NWSDA)

The NWSDA is the perfect companion to the PGS Australian MegaSurveys providing the user with a regional understanding on a continental scale and delivering a detailed insight into NWS petroleum provinces.

The newly updated version will include almost 70,000 km of 2D seismic and over 1,600 released wells throughout an area of around 2 million sq.km. This package also contains regional grids for bathymetry, gravity, magnetic, TOC, HI and VR data.

- 70,000+ km seismic data
- Formatted well database
- Regional horizon interpretation
- Workstation projects
- Regional profiles
